MAY 10-12, 2016
This course covers motor grader safety, maintenance inspections, basic and advanced road maintenance techniques. Students will spend time both in the classroom and on a motor grader practicing what they have learned.
Instructors representing various equipment manufacturers are available to provide help and suggestions for improving the operator’s skills.

ALL PERSONNEL MUST ATTEND THE FIRST DAY, TUESDAY, MAY 10, TO HEAR THE LECTURE AND SAFETY TRAINING!
The other (2) full days are with professional motor grader instructors and you can choose to come one or both days. Please take this opportunity to learn from the very best motor grader operators in the business.
