Target Audience: County Maintenance crews, Local Public Works Departments, Tribal Communities and the Oklahoma Department of Transportation.

Course Description: Traffic Incident Management Basics (Roads Scholar Course 6) This 4-hour class is available to all disciplines of emergency responders, is a pre-requisite to attend the 6-hour TIMS Instructor class, and covers building teams who can work together in a coordinated manner, from the moment the first emergency call is made. You will learn the correct deployment of response vehicles and equipment, how to create a safe work area using traffic control devices, and techniques to speed up accident clearance with an emphasis on reducing the number of struck-by and deaths of roadway workers and responders, reducing secondary crashes, reducing on-scene times of responders of roadway incidents and continuing public education with regard to Oklahoma traffic laws pertaining to this issue.

INSTRUCTOR: Alan Sanders; Alan Sanders is a 30 year veteran of the Fire and EMS communities. He retired from the fire service as a Training Officer and has served as Training Coordinator for a Fire and EMS training facility. Alan is recognized by the Federal Highway Administration as a Traffic Incident Management Instructor.
